RE: Auburn Downtown Sound System

To BOW members:

The attached quote proposals are being submitted to the Board of Public Works and Safety for the next regularly scheduled meeting on December 22, 2022, for approval to proceed with purchase and installation.

Funding for this project was approved by Auburn Redevelopment Commission at their December 6, 2022 meeting, at a not to exceed cost of \$75,000.

"Sound System" Quote is for purchase and installation of commercial grade all-weather speakers, mounted to existing decorative street light poles around the Courthouse area.

"6th Street" Quote is for purchase and installation of commercial grade all-weather speakers, mounted to existing decorative street light poles along West 6th Street.

There will be a main control panel installed at City Hall. 6th Street will have a control panel installed as well. Both these systems can be controlled independently, as well as synchronized, depending on event requirements.

Sound System can easily be expanded as street lighting is upgraded.

Please contact me with any questions you might have, thank you.

Sincerely,

Daryl K. McConnell, Director of Engineering
Municipal City of Auburn
260-925-8264 ext. 1401
