RE: West Fifteenth Street Relief Storm Sewer Project

To BOW members:

This request is being submitted for consideration by the Board of Public Works and Safety at the next regularly scheduled meeting on December 19, 2023.

It has been determined that a drainage problem exists within the existing storm sewer mains and storm sewer inlets located at the intersection of West Fifteenth Street and "future" Connection Drive within the Seven Fifteen Development. Currently, these structures maintain an approximate depth of 1.5 feet of storm water which is due to the outlet elevation of the discharge pipe, located approximately 300 feet to the south, being too low to allow proper drainage with respect to current water levels that exist within the existing engineered drainage basin.

It is being proposed, prior to the construction of Connection Drive to the north, that a 12-inch relief storm sewer be installed which would connect the existing storm sewer in West Fifteenth Street to the future storm outlet of Seven Fifteen Development (See attached plan). The future storm outlet of Seven Fifteen Development will then be connected to the "proposed" John Ketcham County Drain which is planned for construction in early 2024.

Two (2) contractors quotes were received to complete this work (See attached) with the low quote being J.J.P Corporation at a cost of \$23,800.00.

Please contact me with any questions you might have, thank you.

Respectfully,

A handwritten signature in black ink, appearing to read "Todd Sattison", with a stylized flourish at the end.

Todd Sattison, Superintendent
