Please prepare a letter similar to the attachment above for your utility capacity for the DeKalb County Central Communications Center.

In order for this project to go to County Planning the engineer needs this info to file for a dev plan/rezoning project.

Thanks.

Vivian

Message sent 8/25/10 to utilities

All,

– This project is the future communications center north of town (project with the county)

- Please provide info to Viv by Friday 08-27-2010.

1) Will your utility be servicing this area?

a. If so, a letter is needed from utilities stating “that there is capacity/ability to handle the new building for water, sewer, electric, etc.”

2) Permit fees, do you want us charge permit fees when if connect to utilities?

Permits: if applicable

- Sewer – tap & connection fee

- Water – depending on the tap size (what is the tap size) was it on the prints?

- Electric – hookup fee / temp & perm service
