**ORDINANCE 2018-05**

**AN ORDINANCE ESTABLISHING AN ASSET  
CAPITALIZATION POLICY**

**WHEREAS**, the City of Auburn Common Council is the governing body in Auburn, Indiana, DeKalb County, State of Indiana; and

**WHEREAS**, the City of Auburn Common Council desires to establish an asset capitalization policy for the City and its various Departments and Utilities for those assets with a useful life greater than five (5) years;

**NOW, THEREFORE, BE IT ORDAINED BY THE COMMON  
COUNCIL OF THE CITY OF AUBURN, INDIANA:**

**SECTION 1. DEFINITIONS AND PROVISIONS:**

For the purpose of this ordinance, the following definitions shall apply unless the context clearly indicates or requires a different meaning.

**Tangible Assets**

Assets that can be observed by one or more of the physical senses. They may be seen and touched and, in some environments, heard and smelled.

**Fixed Asset**

Tangible assets of a durable nature employed in the operating activities of the unit and that are relatively permanent and are needed for the production or sale of goods or services are termed property, plant and equipment or fixed assets. These assets are not held for sale in the ordinary course of business. This broad group is usually separated into classes according to the physical characteristics of the items (e.g., land, buildings, improvements other than buildings, machinery and equipment).

**Capital Outlays**

Expenditures that benefit both the current and future fiscal periods. This includes costs of acquiring land or structures; construction or improvement of buildings, structures or other fixed assets; and equipment purchases having an appreciable and calculable period of usefulness. These are expenditures resulting in the acquisition of or addition to the government's general fixed assets.

**LAND:**

This City shall capitalize all land purchases, regardless of cost.

Exceptions to land capitalization are land purchased outright, as easements, or rights-of way for infrastructure. Examples of infrastructures are roads and streets, street lighting systems, bridges, overpasses, sidewalks, curbs, and street signs.

Original cost of land will include the full value given to the seller, including relocation, legal services incidental to the purchase (including title work and opinion), appraisal and negotiation fees, surveying and costs for preparing the land for its intended purpose (including contractors' and/or City workers' salary and benefits), such as demolishing buildings, excavating, clean up and/or inspection.

A department will record donated land at fair market value on the date of transfer plus any associated costs.

Purchases made using Federal or State funding will follow the source funding policies and above procedures.

**MACHINERY AND EQUIPMENT:**

The definition of machinery and equipment is: an apparatus, tool or conglomeration of pieces to form a tool. The tool will stand alone and not become a part of a basic structure or building. The tool shall have a useful life greater than five (5) years.

The City will capitalize and tag items with an individual value equal to or greater than \$5,000.00. Machinery combined with other machinery to form one unit with a total value greater than the above-mentioned limit will be one unit.

Shipping charges, consultant fees, and any other cost directly associated with the purchase, delivery, or set up, (including contractors' and/or City employees' salary and benefits) that makes such equipment operable for its intended purpose will be capitalized.

Improvements or renovations to existing machinery and equipment will be capitalized only if the result of the change meets all of the following conditions:

- a. total costs exceeds \$5,000.00
- b. the useful life is extended two or more years, and
- c. the total costs will be greater than the current book value and less than the fair market value.

Examples include:

A work truck being equipped with screens, lights or radios for use as a single unit throughout its life expectancy is considered one unit.

If police cars are constantly changing light bars or radios to other vehicles, the City will capitalize each piece of equipment separately if it meets the required dollar amount.

A department's computer (CPU, monitor, keyboard and printer) is considered one unit.

A department will record donated machinery and equipment at fair market value on the date of transfer with any associated costs.

Purchases made using Federal or State funding will follow the source funding policies and above procedures.

### **BUILDINGS:**

A department will capitalize buildings at full cost with no subcategories for tracking the cost of attachments. Examples of attachments are roofs, heating, cooling, plumbing, lighting, or sprinkler systems, or any part of the basic building.

A department's new building will be capitalized only if it meets the following conditions:

- a. the total cost exceeds \$5,000, and
- b. the useful life is greater than five (5) years.

A department improving or renovating an existing building will capitalize the cost only if the result meets all of the following conditions:

- a. the total cost exceeds \$5,000,
- b. the useful life is extended two or more years, and
- c. the total cost will be greater than the current book value and less than the fair market value.

Capital building costs will include preparation of land for the building, architectural and engineering fees, bond issuance fees, interest cost (while under construction), account costs if material and any costs directly attributable to the construction of a building.

A department will record donated buildings at fair market value on the date of transfer with any associated costs.

Purchases made using Federal or State funding will follow the source funding policies and above procedures.

**IMPROVEMENTS OTHER THAN BUILDINGS:**

The definition of this group is improvements to land for better enjoyment, attached or not easily removed, and will have a life expectancy of greater than two years.

Examples are walks, parking areas and drives, golf cart / recreational paths, fencing, retaining walls, pools, outside fountains, planter underground sprinkler systems and other similar items.

Improvements do not include roads, streets or assets that are of value only to the public. For example, Chestnut Street is a public street with greatest value to the public. Roads or drives upon City-owned land that provide support to our facilities are assets. A sidewalk down the road for public enjoyment is an infrastructure improvement and is not capitalized. However, sidewalks installed upon City-owned land for use by the public and for the support of our facility are capital assets.

This City will capitalize new improvements other than buildings only if it meets the following conditions:

- a. the total cost exceeds \$5,000, and
- b. the useful life is greater than five (5) years.

A department will capitalize improvements or renovations to existing improvements other than buildings only if the result meets the following conditions:

- a. the total cost exceeds \$5,000,
- b. the useful life is extended two or more years, and
- c. the total cost will be greater than the current book value and less than the fair market value.

A department's donated improvements other than buildings will be recorded at fair market value on the date of transfer with any associated costs.

Purchases made using Federal or State funding will follow the source funding policies and above procedures.

### **Historical Cost**

The cash equivalent price exchanged for goods or services at the date of acquisition. Land, buildings, equipment, and most inventories are common examples of items recognized under the historical cost attribute.

### **Enterprise Funds**

Those funds used to account for operations (a) that are financed and operated in a manner similar to private business enterprise - where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or (b) where the governing body has decided that periodic determination of revenues earned, expenses incurred and/or net income is appropriate for capital maintenance, public policy, management control, accountability and other purposes.

The enterprise funds of the City of Auburn, Indiana shall include the municipally owned Electric, Water, Wastewater and Essential Service utilities. Operation of these utilities shall require enterprise fund accounting and reporting.

## **SECTION 2. - RECORDING AND ACCOUNTING:**

The City and its various departments shall classify capital expenditures as capital outlays within the fund from which the expenditure was made in accordance with the Chart of Accounts of the Cities and Towns Accounting manual. The cost of property, plant and equipment includes all expenditures necessary to put the asset into position and ready for use. For purposes of recording fixed assets of the City and its departments, the valuation of assets shall be based on historical cost or where the historical cost is indeterminable by estimation for those assets in existence.

The City's municipally owned utilities shall record acquisition of Fixed Assets in accordance with generally accepted accounting principles. When an asset is purchased for cash, the acquisition is simply recorded as the amount of cash paid, including all outlays relating to its purchase and preparation for intended use. Assets may be acquired under a number of other arrangements including:

- a. assets acquired for a lump-sum purchase price
- b. purchase on deferred payment contract
- c. acquisition under capital lease
- d. acquisition by exchange of non-monetary assets
- e. acquisition by issuance of securities
- f. acquisition by self-construction, and
- g. acquisition by donation or discovery.

Some of these arrangements present special problems relating to the cost to be recorded, for example, in utility accounting, interest during a period of

construction has long been recognized as a part of the asset cost. Reference to an intermediate accounting manual will illustrate the recording of acquisition of assets under the aforementioned acquisition arrangements. For purposes of recording fixed assets of the utilities the valuation of assets shall be based on historical cost.

In addition, an asset register (prescribed form 211/or computer equivalent) shall be maintained to provide a reasonable assurances that:

1. Capital expenditures made by the City, its various departments and utilities are in accordance with management's authorization as documented in the minutes.
2. Transactions of the utility are recorded as necessary to permit preparation of financial statements in conformity with generally accepted principles.
3. Adequate detail records are maintained to assure accountability for City and utility-owned assets.
4. Access to assets is permitted in accordance with management's authorization.
5. The recorded accountability for assets is compared with the existing assets every year and appropriate action be taken with respect to any differences.

**SECTION 3.**

This Ordinance shall be in full force and effect from and after its passage and approval by the Mayor and the Common Council of the City of Auburn, Indiana.

**PASSED AND ADOPTED** by the Common Council of the City of Auburn, Indiana,  
this \_\_\_\_\_ day of \_\_\_\_\_, 2018.
