#### Product Details

Product Line CF

Hoffman/Lamson offers a service program to help our customers enjoy enhanced reliability from their Hoffman/Lamson blowers and prevent costly down time.

This program reflects the desire of Hoffman/Lamson Service Personnel to prevent equipment failure and to solve root cause blower problems. Blower problems are often the result of operational, system, installation, or other peripheral causes that are easily determined by personnel trained and certified by Hoffman/Lamson. Participants in this program benefit from the combined knowledge and experience within the Hoffman/Lamson Engineered Products Division.

Participants in this program will receive the attention of Hoffman/Lamson Factory Service Personnel who will make an annual or semi-annual service call (usually dictated by the severity of the blower service), at which time the following will be performed:

1. Bearing replacement as needed for PMA
2. Inspection and evaluation of shaft seals – replaced as needed
3. Inspection and evaluation of bearing housing, reservoir, retainers, bearing hardware, gaskets, shims, spacers and associated hardware
4. Lubrication change and oiler inspection, if applicable
5. Coupling inspection and evaluation
6. Laser shaft alignment to hot condition
7. Motor evaluation, amp check
8. Blower operational check; vibration readings, bearing temperature readings, surge check and recommendation for correction, if needed
9. Installation inspection for pipe misalignment, foundation deficiencies with recommendations
10. Valve inspection for proper operation
11. Controls inspection and operational adjustments
12. Filter inspection and recommendations (Customer to clean filter but must keep a record)

At the conclusion of the service detailed above, the customer will be provided with a comprehensive report complete with a vibration report and recommendations. The cost of this service includes bearing replacement for each blower as necessary and seal inspection for each blower. In the event a bearing change is not recommended, the bearing kit will remain with the customer for renewed PMA's or for future use as consumable parts. If any additional parts are identified as problematic, their replacement will be

offered at a 15% subscriber discount.

If the blower is in or is restored to a warrantable condition and routine maintenance is performed, a oneyear Limited Hoffman and Lamson Factory Warranty will be applied to the **external components** of the blower. This partnership program between Hoffman/Lamson and the owner requires periodic maintenance by the operator in accordance with the O&M manual. This service is offered in accordance with our standard Terms & Conditions attached.

If the blower cannot be placed in a warrantable condition onsite, we will recommend that it be sent to the factory or to a local authorized service center for a complete disassembly and inspection, after which a complete repair proposal will be made. Any required motor work should be completed prior to the arrival of the Hoffman/Lamson Service Technician to preclude return trips.

Factory warranty will cover defects in material and workmanship of the blower or failure resulting from services provided. We will make every effort to give warranty repairs priority status if necessary. Failures beyond Hoffman/Lamson's control are not covered. These include such circumstances as motor failures, blower failures resulting from surge conditions, unusual damage to the blower or accessories, product misuse, pre-existing conditions, improper maintenance or operation, acts of God, or other incidental situations. Hoffman/Lamson will utilize every effort to assist the customer should any type of problem arise.

It is the responsibility of the customer to provide a safe working environment for the service technician

**PLEASE SUBMIT PURCHASE ORDER TO:**

Gardner Denver Nash

[Service.CF@lrco.com](mailto:Service.CF@lrco.com)

Please note as this is an estimated quote, actual hours and expenses would be invoiced. This service is offered in accordance with our standard rates, and Gardner Denver Nash T & C's apply.

Please note that once a Service Visit has been scheduled, time has been reserved in the schedule exclusively for you. If the visit is cancelled less than 24 hours before it is scheduled to take place, a minimum cancellation fee of \$500 or 10% of the total visit (whichever is greater) will be charged.

**Emergency Service Rates**

Service rates for emergency field service requests (typically 2 weeks or less from request to departure) will incur 20% for labor and travel rates before a technician or engineer departs and will be communicated in advance.

To avoid a cancellation fee, please provide notice at least 24 hours prior to your appointment.

You can cancel or reschedule an appointment by emailing us at: [Service.CF@lrco.com](mailto:Service.CF@lrco.com) or calling (1-877-436-2741)
