Frank,

I was not able to get any Photometric Plans for Rieke Park's Lantern form Genie House, but he was able to share the following information with us. Please let me know if there is anything else you think we could ask or need.

Thanks!

The top of the fixture is metal top so the bulb won't be visible and most of the light will go straight down. I don't think you will have any issues. It is 60 watt max and with the 1 medium socket is placed in the top of the fixture.
