This PROPOSAL is offered to **Auburn Department of Water**, hereafter called the BUYER, by Mid Atlantic Storage Systems, Inc., hereafter called the SELLER, for the following improvements/repairs to be made to the existing Aquastore glass-coated, bolted-steel storage tank as manufactured by A.O. Smith, Inc. of Dekalb, IL.

TANK OWNER : Auburn Department of Water; Auburn, IN

REFERENCE : Model 42x19 SFTT (42'dia. x 19' tall – 199,000 gallons) – MIP # 8970401 and installed by Great Lakes Aquastore back in 1997.

SCOPE OF WORK – INTERIOR

Option # 1 – Mid Atlantic Storage Systems, Inc. proposes to re-edgecoat/recaulk ALL of the horizontal and vertical interior tank seams and bottom manway on the existing Aquastore glass-coated, bolted-steel industrial storage tank. The sealant is used to ensure that the tank is "liquid tight", as well as to protect the panel sheet edges from corrosion. Over time, the sealant degrades and needs to be reapplied. An interior recaulk is typically required sooner than an exterior recaulk. Unlike an exterior recaulk, an interior recaulk requires the tank to remain out of service for approx. 5 - 7 days in order for the sealant to properly cure.

Option # 2 - Mid Atlantic Storage Systems, Inc. proposes to provide and install new sacrificial anode bars on the inside floor of the existing Aquastore glass-coated, bolted-steel water storage tank. The exact number of anode bars is determined by the conductivity of the stored water and the size of the tank. A tank of this size normally takes (3) anode bars. The sacrificial anode bars are part of a new NSF approved cathodic protection system, which was not available at the time that the above referenced tank was originally installed. The anode bars assist with protecting the tank interior wetted surfaces from excessive corrosion.

Option # 3 – Mid Atlantic Storage Systems, Inc. proposes to inspect the interior of the tank and repair any other misc. minor glass chips, etc.. in the tank coating using the std. tank sealer to prevent potential corrosion, etc..

SCOPE OF WORK – EXTERIOR

Option # 4 – Mid Atlantic Storage Systems, Inc. proposes to complete an exterior "chemical wash" of the roof and tank sidewalls with a mild solution of muriatic acid in order to remove as much of the existing streaking as possible and restore the exterior appearance.

Option # 5 – Mid Atlantic Storage Systems, Inc. proposes to re-edgecoat/recaulk ALL of the horizontal and vertical exterior tank seams, bottom manway, and roof assembly on the existing Aquastore glass-coated, bolted-steel industrial storage tank. The sealant is used to protect the panel sheet edges from corrosion. Over time, the sealant degrades and needs to be reapplied in order to protect the sheet edges.

Option # 6 – Mid Atlantic Storage Systems, Inc. proposes to provide and install approximately 4,750 new exterior protective bolt caps with sealer to cover the exterior tank fasteners (i.e. nuts and washers) of the existing Aquastore glass-coated, bolted-steel industrial storage tank. The bolt caps assist with protecting the exterior nut and washer from corrosion, and also provides a more aesthetically pleasing exterior tank appearance.

Option # 7 – Mid Atlantic Storage Systems, Inc. proposes to inspect the exterior of the tank and repair any misc. minor glass chips, etc. in the tank coating using the standard tank sealer to prevent potential corrosion, etc.
